Summary

Dynamic Software Engineer with 2 years of experience engineering scalable full-stack applications and microservices for fintech and e-commerce systems. Improved backend response time and data processing efficiency by 20% through optimized SQL queries, and reduced post-deployment bugs by 30% via extensive unit testing. Seeking a Software Engineer Intern position to leverage development and testing expertise in enhancing software reliability and performance.

Experience

Meirtec Solutions Pvt. Ltd

Mumbai, India
June 2023 - July 2024

Software Engineer

- Engineered scalable full-stack applications and microservices using Node.js, Express.js, and C#, supporting production-grade fintech systems and e-commerce functionalities.
- Designed and implemented RESTful APIs and optimized SQL Server queries, improving backend response time and data processing efficiency by 20%.
- Validated application reliability by implementing unit tests and integration tests using NUnit and Moq frameworks.
- Led cross-functional collaboration within Agile/Scrum cycles, utilizing Git and CI/CD for deployments while communicating daily with stakeholders and business partners.
- Implemented unit tests using NUnit and Moq for 7+ business-critical modules over a 12-month period, reducing post-deployment bugs by 30% and ensuring consistent code reliability across bi-weekly release cycles.

Innavior Technologies Pvt. Ltd

Bengaluru, India
March 2022 – April 2023

Software Engineer Intern

- Developed and optimized full-stack web applications using Node.js, JavaScript, and Microsoft SQL Server, improving feature delivery efficiency by 25%.
- Built responsive frontend components utilizing HTML5, CSS, and Bootstrap, enhancing application performance and user experience across multiple modules.
- Collaborated in Agile/Scrum development cycles, performing code reviews and unit testing to deliver scalable software solutions.
- Automated internal workflows and API integrations, reducing manual processing effort and improving operational productivity.

Project

AI Sign Language to Speech System

February 2024 - May 2024

- Achieved 92% gesture recognition accuracy through model tuning, dataset preprocessing, and object-oriented programming principles.

Intelligent Patient Monitoring & Alert System

March 2026 - April 2026

- Developed a real-time patient monitoring system simulating physiological signals such as heart rate and oxygen saturation using custom scripting and AWS infrastructure.

Education

Master of Science in Computer Science & Management

Kansas City, MO
2026

Avila University • 3.75

Certifications

GitHub Copilot Professional Certificate

GitHub • 2026

- AI-assisted coding, debugging, and software quality improvement.

Career Essentials in Generative AI

Microsoft & LinkedIn • 2026

- Generative AI, LLMs, prompt engineering, and Responsible AI fundamentals.

Awards & Honors

LeetCode & Hacker Rank Competitive Programming

Leetcode • 2022

- Solved 600+ DSA problems with 5-Star ratings in Java and SQL.

Skills

Programming Languages: Python, Java, JavaScript, HTML5, CSS, C, C++, C#, SQL, .NET, ASP.NET

Frameworks & Libraries: React, Redux, Node.js, Express.js, Spring Boot, Bootstrap, LESS/SASS, TensorFlow, Scikit-Learn, Database Management

Software Engineering: Agile, Scrum, Waterfall, SDLC, Microservice Architecture, RESTful API, Software Design & Architecture, Unit Testing, CI/CD, Cloud Integration, Code Quality, Team Collaboration, Learning Ability, Maintainability, Scalability

AI / Data Technologies: Data Science, Machine Learning, Data Analytics, Data Processing, Model Inference Pipelines, Problem Solving

Tools & Platforms: AWS, GitHub, Docker, Microsoft SQL Server, PostgreSQL, NoSQL, MySQL, Azure, Postman, Jenkins
